

## **DRDO – FICCI Accelerated Technology Assessment and Commercialization Programme**

### **Sweetcorn Products Stabilized Kernels and Paste**

Sweet corn is one of the latest commodities that has made deeper inroads in the Indian food market. Sweet corn products such as preserved kernels and shelf-stable paste are highly susceptible to spoilage and the shelf life is inadequate for long distance transportation and commercial marketing. The higher pH of the products makes them highly prone to microbial spoilage. Therefore, stabilization of these products is highly important and problematic as such.
