

DRDO – FICCI Accelerated Technology Assessment and Commercialization Programme

Instant Cooking Rice

The cooking of rice is time consuming process and requires elaborate cooking facilities like pressure cooker, cooking vessels, gas etc. More over cooking of rice require skill and one should know how much water should be added for cooking perfect rice for consumption. Cooking of rice becomes much more difficult and requires long time in high altitude areas where boiling point of water is less than 100C. The cooked rice has limited shelf life of 12 -24 hrs at ambient condition.
